

The Park at French Creek Community Access and Entry Gates

Per the DCCRs, the access gates will be open during the daylight hours until 6 months after the last home is built. The gates will automatically close at dusk and you will need your remote transmitter or your keypad access code to enter at night. Community exit gates are automatically activated when you approach the exit and do not require a PIN or remote control to open.

Requesting a Primary Family PIN Code:

When you move into your home, contact the AMS Gate Department at 829-7202 or go on-line to www.ams-sa.com and download Gate Access PIN request form a “**primary**” entry Gate Access code under the [FORMS](#) link. AMS will issue a PIN number to open the gate through the keypad. Homeowner’s have the option to use the manual keypads or they may purchase remote transmitters.

Remote Control Transmitters:

For day-to-day usage, the most convenient method to open the gate is the remote control unit. They are available to pick up at the AMS office and cost \$40. Simply press the button on the transmitter as you approach to open the entry gate. If the previous owner gave you a remote, you will need to reactivate it by using the gate update form or by calling AMS Gate Department **with the transmitter number** and your contact information

Secondary/Service Codes and Event Codes:

If you have service guests (housekeepers, repair calls, landscaping crews etc.) you should also have a secondary or “service access” code. If you are having an event or a party, a temporary access code will be needed to allow ease of access for your guest for the evening. The temporary code will be deleted after your event. please include the “event” code on your invitation. Both additional codes can be requested on the AMS-SA.com website under the FORMS link. At a minimum, please allow the gate department 48 hours to issue any type of PIN code.

Adding, Deleting or Changing PIN Codes:

Your primary or service PINs can be changed by calling the AMS Gate Department, by e-mailing, or by faxing in the “Gate Access PIN Request Form” available on www.AMS-SA.com under the FORMS link.

Access Instructions:

When the gates are closed, guests without an access code or remote control will use the directory at the keypad located outside the entry gate to dial your home. They will use the keypad to scroll to your last name in the directory. By your name, there will be a three-digit code, which they enter into the keypad. This will dial your home telephone. The keypad will not display your phone number. These instructions are also on the keypad. When you answer and have identified the caller, press and briefly hold down the "9" button on your telephone. This will signal the gate to open. Once you hear the signal tone, hang up. Your guest must be calling from the keypad system, not a cell phone, for you to enter the gate open signal.

Please NOTE: You are responsible for informing your guest and service people that **TAILGAITING (following a vehicle through the gate) is NOT permitted.** The gates can make contact and cause damage to a vehicle following another vehicle through. The Association does not assume liability for damage incurred to vehicles entering without an access code or remote control. Should you have any code or gate issues, notice the gate malfunctioning or if the gate is involved in an accident, please call 829-7202. Service people are on call 24 hours.
